

43.1	Schur Complements	1529
43.2	SPD Matrices and Schur Complements	1532
43.3	SP Semidefinite Matrices and Schur Complements	1533
43.4	Summary	1535
43.5	Problems	1535

VII Linear Optimization 1537

44 Convex Sets, Cones, \mathcal{H} -Polyhedra 1539

44.1	What is Linear Programming?	1539
44.2	Affine Subsets, Convex Sets, Hyperplanes, Half-Spaces	1541
44.3	Cones, Polyhedral Cones, and \mathcal{H} -Polyhedra	1544
44.4	Summary	1549
44.5	Problems	1550

45 Linear Programs 1551

45.1	Linear Programs, Feasible Solutions, Optimal Solutions	1551
45.2	Basic Feasible Solutions and Vertices	1558
45.3	Summary	1565
45.4	Problems	1565

46 The Simplex Algorithm 1569

46.1	The Idea Behind the Simplex Algorithm	1569
46.2	The Simplex Algorithm in General	1578
46.3	How to Perform a Pivoting Step Efficiently	1585
46.4	The Simplex Algorithm Using Tableaux	1589
46.5	Computational Efficiency of the Simplex Method	1598
46.6	Summary	1599
46.7	Problems	1599

47 Linear Programming and Duality 1603

47.1	Variants of the Farkas Lemma	1603
47.2	The Duality Theorem in Linear Programming	1609
47.3	Complementary Slackness Conditions	1617
47.4	Duality for Linear Programs in Standard Form	1618
47.5	The Dual Simplex Algorithm	1621
47.6	The Primal-Dual Algorithm	1628
47.7	Summary	1638
47.8	Problems	1638
