

IV Algebra: PID's, UFD's, Noetherian Rings, Tensors, Modules over a PID, Normal Forms	1049
30 Polynomials, Ideals and PID's	1051
30.1 Multisets	1051
30.2 Polynomials	1052
30.3 Euclidean Division of Polynomials	1058
30.4 Ideals, PID's, and Greatest Common Divisors	1060
30.5 Factorization and Irreducible Factors in $K[X]$	1068
30.6 Roots of Polynomials	1072
30.7 Polynomial Interpolation (Lagrange, Newton, Hermite)	1079
31 Annihilating Polynomials; Primary Decomposition	1087
31.1 Annihilating Polynomials and the Minimal Polynomial	1089
31.2 Minimal Polynomials of Diagonalizable Linear Maps	1091
31.3 Commuting Families of Linear Maps	1094
31.4 The Primary Decomposition Theorem	1097
31.5 Jordan Decomposition	1103
31.6 Nilpotent Linear Maps and Jordan Form	1106
31.7 Summary	1112
31.8 Problems	1113
32 UFD's, Noetherian Rings, Hilbert's Basis Theorem	1117
32.1 Unique Factorization Domains (Factorial Rings)	1117
32.2 The Chinese Remainder Theorem	1131
32.3 Noetherian Rings and Hilbert's Basis Theorem	1137
32.4 Further Readings	1141
33 Tensor Algebras	1143
33.1 Linear Algebra Preliminaries: Dual Spaces and Pairings	1145
33.2 Tensor Products	1150
33.3 Bases of Tensor Products	1162
33.4 Some Useful Isomorphisms for Tensor Products	1163
33.5 Duality for Tensor Products	1167
33.6 Tensor Algebras	1173
33.7 Symmetric Tensor Powers	1180
33.8 Bases of Symmetric Powers	1184
33.9 Some Useful Isomorphisms for Symmetric Powers	1187
33.10 Duality for Symmetric Powers	1187
33.11 Symmetric Algebras	1191
33.12 Problems	1194
34 Exterior Tensor Powers and Exterior Algebras	1197
