

- Walsh function, 160
- symmetric bilinear form, 440
- symmetric matrix, 173, 456, 478
- symmetric multilinear map, 212, 1180
- symmetric positive definite matrix, 280
- symmetric tensor algebra, 1176
 - construction, 1192
 - definition, 1191
 - universal mapping property, 1192
- symmetric tensor power
 - linear maps, 1184
 - vector space
 - basis, 1186
 - compound, 1184
 - construction, 1181
 - definition, 1180
 - duality, 1189
 - simple or decomposable, 1184
 - universal mapping property, 1180
- symmetry
 - with respect to F and parallel to G , 493
 - with respect to the origin, 495
- system of distinct representatives, 237
- tensor algebra of vector space, 1173, 1175
 - exterior algebra, 1176
 - symmetric algebra, 1176
 - universal mapping property, 1175
- tensor product, *see* Kronecker product
 - linear maps, 1159
 - vector space, 1151
 - m -th tensor power, 1173
 - n -tensor, 1159
 - n -th symmetric power, 1180
 - antisymmetrized tensors, 1208
 - basis, 1163
 - compound, 1159
 - construction, 1156
 - Currying property, 1167
 - duality, 1169
 - properties, 1164
 - simple or decomposable, 1159
 - symmetrized tensors, 1190
 - tensor space $T^{r,s}(V)$, 1177
 - universal mapping property, 1151
- tensor product of matrices, *see* Kronecker product
- tensor space $T^{r,s}(V)$, 1177
 - contraction, 1178
 - contravariant, 1178
 - covariant, 1178
 - duality, 1178
 - homogeneous of degree (r, s) , 1176, 1177
- tetrahedron, 817, 818
- Thales' theorem, 792, 828
- topological space, 864
- topology, 335
- total derivative, 102, 454, *see* derivative of
 - linear map
 - Jacobian matrix, 454
- total differential, *see* derivative of linear map
- trace, 102, 338, 558, 963
 - bilinear form, 1149
- trace norm, *see* nuclear norm
- trajectories, 791
- translation, 792, 797, 821, 827, 838
 - definition, 823
- translation part of an affine map, 824
- transporter, *see* conductor
- transpose
 - map, 123
- transpose map, 422
- transpose of a matrix, 56, 86, 468, 531, 628, 630
- transposition matrix, 254
- transvection of hyperplane, 310
 - direction, 310
- triangle, 817
- triangle inequality, 325, 445
 - Minkowski's inequality, 333
- triangularized matrix, 556
- tridiagonal matrix, 278
- trust region, 1725
- unbounded below, *see* lower bounds
