

- of an affine space, 837, 902
- projective frame
 - definition, 868
- projective geometry, 855
- projective isomorphism, 882
- projective map, 856, 909
 - definition, 882
- projective space, 860
 - definition, 860
 - of circles, 876
 - of conics, 878
 - of quadrics, 880
- projective subspace
 - definition, 865
- projective transformation, 882
- projectively independent points, 865
- projectivity, 882
- proper
 - extended real-valued function, 1824
 - isometry, 470
 - orthogonal transformations, 470
 - unitary transformations, 533
- proper subspace, *see* eigenspace
- proper value, *see* eigenvalue
- proper vector, *see* eigenvector
- proximal minimization, 1889
- proximity operator, 1889
- pseudo-inverse, 56, 479, 749, 1518
 - definition, 759
 - Penrose properties, 767
- quadrangles, 916
- quadratic constrained minimization problem, 1511
- quadratic form, 517
 - associated with φ , 440
- quadratic functional, 1675
- quadratic optimization
 - on the ellipsoid, 1522
 - on the unit sphere, 1522
 - the general case, 1517
 - the positive definite case, 1507
- quadratic programming, *see* quadratic optimization
 - ADMM form, 1891, 1892
- quadric, 855, 938
- quasi-compact, 1353, 1356
- quaternions, 587
 - conjugate, 589
 - Hamilton's identities, 588
 - interpolation formula, 604
 - multiplication of, 588
 - pure quaternions, 590
 - scalar part, 589
 - unit, 533
 - vector part, 589
- quotient topology, 864
- Radon's theorem, 817
- ramp function, *see* **ReLU**
- rank
 - linear map, 93
 - matrix, 428
 - of a linear map, 737
- rank normal form, 307
- ratio, 439
 - of three points
 - definition, 825
 - preservation by affine maps, 912
- rational curves, 856, 949
- rational surfaces, 856, 949
- Rayleigh ratio, 631
- Rayleigh–Ritz
 - ratio, 776
 - theorem, 776
- Rayleigh–Ritz theorem, 631, 633
- real affine space of dimension n , 799
- real basis, 937
- real conic, 939
- real eigenvalues, 456, 478
- real Euclidean plane, 938
- real hypersurface, 937
- real points, 937
- real-valued function
 - constrained local extremum, 1462
