

- definition, 516
 - positive, 518
 - positive definite, 518
- Hermitian geometry, 515
- Hermitian norm, 523
- hermitian positive definite matrix, 280
- Hermitian reflection, 535
- Hermitian space, 515
 - definition, 518
 - Hermitian product, 518
- Hessian, 1440
- Hessian $\nabla^2 f_u$, 1672
- Hilbert and Cohn-Vossen, 903
- Hilbert bases
 - separable, 2127
- Hilbert basis, 1648, 2111
- Hilbert matrix, 359
- Hilbert space, 453, 526, 1646
 - ℓ^2 , 1646
 - $\ell^2(K)$, 2120
 - $L^2(T)$, 2128
 - $L^2([-1, 1])$, 2129
 - $L^2([a, b])$, 1646
 - adjoint map, 1661, 1662
 - dual space, 1658
 - Hilbert basis, 1648
 - orthogonal family, 2111
 - orthonormal family, 2111
 - Fourier coefficient, 2111, 2112
 - parallelogram law, 1648
 - Projection lemma, 1649
 - projection lemma, 1606
 - projection map $p_X: E \rightarrow X$, 1653
 - projection vector $p_X(u)$, 1653
 - real, 1646
 - Riesz representation theorem, 1659
 - separable, 2127
 - total orthogonal family, 2111
 - properties, 2124
- Hilbert's Nullstellensatz, 412
- Hilbert-Schmidt norm, *see* Frobenius norm
- Hodge $*$ -operator, 1215
 - basis application, 1215
 - properties, 1215
- homogeneous coordinates, 869
 - definition, 870
- homogeneous polynomial, 876, 937
- homogenization, 837
- homogenization of an affine space
 - definition, 850
- homogenizing, 856
- homogenous system, 296
 - nontrivial solution, 296
- homography, 882
- homothety
 - definition, 826
- Horn and Johnson, 1531
- Householder matrices, 474, 493
 - definition, 496
- Householder matrix, 535
- hyperplane, 83, 453, 526, 838, 865, 938
 - affine, 832, 838
- hyperplane at infinity, 902, 905, 909
- hyperplane model of projective geometry, 863
- hyperplane symmetry
 - definition, 494
- hypersurface $V(P)$, 937
- ideal, 412
 - radical, 412
- idempotent function, 175
- identity matrix, 55, 86
- image
 - linear map, 92
- image $\text{Im } f$ of f , 737
- image center, 947
- image compression, 769
- image plane, 947
- implicit Q theorem, 665, 676
- improper
 - isometry, 470, 533
 - orthogonal transformation, 470
 - unitary transformation, 533
- incidence matrix, 699, 703, 705
