

- effective domain, 1822
- epigraph, 1821
- finite, 1821
- improper, 1824
- lower semi-continuous, 1826
- lower semi-continuous hull, 1826
- minimum set, 1853
- one-sided directional derivative, 1842
- polyhedral, 1858
- positively homogeneous, 1843
- proper, 1824
  - continuous, 1828
  - subdifferential, 1834
  - subgradient, 1834
  - sublevel sets, 1826
- exterior algebra, 1176, 1200
  - construction, 1210
  - inner product, 1213
  - interior products, 1211
    - insertion operator, 1225
    - left hook, 1218
    - right hook, 1222
  - universal mapping property, 1211
  - wedge product, 1209
- exterior tensor power
  - linear maps, 1201
  - simple or decomposable
    - Plücker's criteria, 1231
    - criteria, 1228
- vector space
  - alternating  $n$ -forms, 1201
  - alternating  $n$ -tensors, 1201
  - basis, 1203
  - compound, 1201
  - construction, 1200
  - definition, 1200
  - duality, 1206
  - simple or decomposable, 1201
  - universal mapping property, 1200
- face recognition, 784
- facet, 1562
- families
  - of finite support, 797
  - of scalars, 797
- family, *see*  $I$ -indexed family
  - of points, 805
  - of scalars, 805
  - of weighted points, 805
- Farkas lemma, 1605, 1742
- Farkas–Minkowski, 1604
- Farkas–Minkowski lemma, 1604, 1663, 1743
- feasible start Newton method, 1757
  - equality constraints, 1757
- feature, 769
  - vector, 770
- feature embedding, *see* feature map
- feature map, 1907
- feature space, 1907, 2047
- Fenchel conjugate, *see* conjugate function
- Fiedler number, 713
- field
  - $K$  arbitrary, 797
  - $\mathbb{R}$  of real numbers, 797
  - characteristic of  $a$ , 797
- finding eigenvalues
  - inverse iteration method, 673
  - power iteration, 672
  - Rayleigh quotient iteration, 674
  - Rayleigh–Ritz method, 669, 671
- finite field, 950
- finite intersection property, 1353
- finite projective spaces, 950
- finite support, 451, 806, 838
- first principal component
  - of  $X$ , 774
- fixed point, 824
  - of an affine map, 969
- flip, 979
  - transformations, 470, 533
- flip about  $F$ 
  - definition, 494
- focal length, 947
- focus of projection, 947
