

- affine hyperplane, 792, 832, 833, 1543, 1831
 - definition, 812
 - half spaces, 1543, 1831
- affine independence, 792, 813
 - definition, 813
- affine isometry, 967
 - definition, 967
- affine map, 468, 791, 792, 819, 909
 - definition, 819
 - representation in terms of a matrix, 824
- affine orthogonal
 - symmetry about F , 972
- affine patch
 - definition, 903
- affine space, 791, 797
 - definition, 797
 - example
 - a line, 800
 - a paraboloid of revolution, 801
 - a plane, 801
- affine structure
 - canonical, 799
 - natural, 799
- affine subspace, 792, 1474, 1542
 - definition, 808
 - dimension, 1542
 - direction, 1542
 - flat, 808
- affinely dependent families, 815
- affinely independent families, 813
- agreement kernel, 1913
- Alexandroff compactification, 1361
 - definition, 1362
- algebraic curve, 861
- algebraic geometry, 855, 862, 877, 881, 903
- algebraic plane curves, 881
- algebraic surface, 862, 881
- algebraic varieties, 412
- algebraic variety, 862
- algebraically closed field, 566
- alternating direction method of multipliers, 1876
 - convergence, 1880
 - dual residual, 1888
 - primal residual, 1888
 - proximity operator, 1889
 - residual, 1878
- alternating method of multipliers
 - scaled form, 1879
- alternating multilinear map, 212, 1197
- altitude of a point, 942
- analytic centering problem, 1818
- angle, 936
 - of complex lines, 942
 - of lines, 938, 939
 - of unit vectors, 938
- annihilating polynomials, 1087
- annihilator
 - linear map, 1089
 - of a polynomial, 1087
- antipodal points, 863
- applications
 - of Euclidean geometry, 478
 - of projective geometry, 947
- arbitrary field, 838
- arc, 1350
 - composition, 1350
- arcwise connected, 1351
- Arnoldi iteration, 667
 - breakdown, 667
 - Rayleigh–Ritz method, 669
 - Arnoldi estimates, 669
 - Ritz values, 669
- Artin, Emil, 955
- attribute, 769
- augmented Lagrangian, 1871
 - penalty parameter, 1871
- automorphism, 99
- average, 770
- axis
 - of rotation, 963
- Bézier curve, 245
 - control points, 245
