

Index

- $(k + 1)$ th principal component
 - of X , 774
- (m, n) -shuffle, 1193
- 3-sphere S^3 , 599
- A -conjugate, *see* conjugate vectors, *see* conjugate vectors
- C^0 -continuity, 247
- C^2 -continuity, 247
- I -indexed family, 65
 - I -sequence, 65
- I -sequence, 65
- K -algebra
 - definition, 1174
 - graded, 1176
 - homogeneous elements rank n , 1176
 - homomorphism, 1174
 - ideal, 1174
- LDU -factorization, 260
- LU -factorization, 257, 259
- QR algorithm, 649
 - deflation, 662
 - double shift, 661, 664
 - Francis shift, 665
 - implicit Q theorem, 665
 - implicit shift, 661
 - bulge chasing, 661
 - shift, 661, 662
 - Wilkinson shift, 663
- QR -decomposition, 473, 533
- $\text{Hom}(E, F)$, 99
- $\arg \max_{v \in U} J(v)$, *see* maximizer
- $\arg \min_{v \in U} J(v)$, *see* minimizer
- ℓ^1 -regularized regression, *see* lasso
- ϵ -SV regression
 - dual program, 2099
- ϵ -SV regression, 2098
- ϵ -hull, 1384
- ϵ -insensitive SV regression, 2098
- ϵ -subdifferential, 1850
- ϵ -subgradient, 1850
- ReLU**, 1845
- SO**(2), 605
- SU**(2), 587
 - adjoint representation, 589
- U**(1), 605
- $\text{aff}(S)$, *see* affine hull
- $\text{conv}(S)$, *see* convex hull
- $\text{span}(S)$, *see* linear span
- so**(n), 471
- su**(2), 589
 - inner product, 602
- ν -SV regression
 - dual program, 2075
 - kernel version
 - dual program, 2098
- ν -SV regression version 2
 - dual program, 2101
- ν -SV regression, 2070, 2071
 - ϵ -slab, 2070
 - best fit hyperplane, 2069
 - blue margin, 2069
 - error, 2069
 - errors, 2070
 - exceptional support vector, 2077
 - fail the margin, 2077
 - kernel version, 2097
