

54.11 Existence of Support Vectors for (SVM_{s3})	1993
54.12 Solving SVM (SVM_{s3}) Using ADMM	1995
54.13 Soft Margin SVM; (SVM_{s4})	1999
54.14 Solving SVM (SVM_{s4}) Using ADMM	2007
54.15 Soft Margin SVM; (SVM_{s5})	2009
54.16 Solving SVM (SVM_{s5}) Using ADMM	2013
54.17 Summary and Comparison of the SVM Methods	2015
54.18 Problems	2028
55 Ridge Regression, Lasso, Elastic Net	2033
55.1 Ridge Regression	2034
55.2 Ridge Regression; Learning an Affine Function	2037
55.3 Kernel Ridge Regression	2046
55.4 Lasso Regression (ℓ^1 -Regularized Regression)	2050
55.5 Lasso Regression; Learning an Affine Function	2054
55.6 Elastic Net Regression	2060
55.7 Summary	2066
55.8 Problems	2066
56 ν-SV Regression	2069
56.1 ν -SV Regression; Derivation of the Dual	2069
56.2 Existence of Support Vectors	2080
56.3 Solving ν -Regression Using ADMM	2090
56.4 Kernel ν -SV Regression	2096
56.5 ν -Regression Version 2; Penalizing b	2099
56.6 Summary	2106
56.7 Problems	2107
X Appendices	2109
A Total Orthogonal Families in Hilbert Spaces	2111
A.1 Total Orthogonal Families, Fourier Coefficients	2111
A.2 The Hilbert Space $\ell^2(K)$ and the Riesz–Fischer Theorem	2120
A.3 Summary	2129
A.4 Problems	2130
B Matlab Programs	2131
B.1 Hard Margin (SVM_{h2})	2131
B.2 Soft Margin SVM $(\text{SVM}_{s2'})$	2135
B.3 Soft Margin SVM (SVM_{s3})	2143
B.4 ν -SV Regression	2148
