

- covariance, 771
- covariance matrix, 771
- covariant, 406
- covector, *see* linear form, *see* linear form
- Cramer's rules, 228
- critical point
 - nondegenerate, 1472, 1473
 - real-valued function, 1459
- cross-product, 454
- cross-ratio, 884, 912, 938, 939
 - definition, 912
 - of hyperplanes, 934
- cryptography, 949, 951
- curve interpolation, 245, 247
 - de Boor control points, 247
- curves, 792
- data compression, 60, 748, 767
 - low-rank decomposition, 60
- de Boor control points, 247
- QR -decomposition, 460, 473, 478, 493, 498, 502, 529, 534
- QR -decomposition, in terms of Householder matrices, 498
- degree matrix, 699, 702, 704, 708
- degree of a vertex, 699
- Delaunay triangulation, 478, 729
- Demmel, 769
- dense set, 1648
- derivative of linear map, 1412
 - derivative of inversion, 1419
- Desargues's theorem, 792
 - affine version, 830
 - projective version, 887, 911
- descent direction, 1685
- determinant, 215, 217
 - Laplace expansion, 217
 - linear map, 230
- determinant of a linear map, 470
- determining orbits of asteroids, 755
- diagonal matrix, 555
- diagonalizable, 562
- diagonalizable matrix, 555
- diagonalization, 130
 - of a normal linear map, 621
 - of a normal matrix, 631
 - of a self-adjoint linear map, 622
 - of a symmetric matrix, 629
- diagonalize a matrix, 478
- Dieudonné, 955
- differential, *see* derivative of linear map
- differential equations
 - system of first order, 1111
- dilatation, 838
 - affine, 826
 - central, 826, 838
- dilatation of center a and ratio λ
 - definition, 826
- dilation, 826
- dilation of hyperplane, 308
 - direction, 308
 - scale factor, 308
- dimension
 - of a projective space, 861
 - of a projective subspace, 865
 - of a subspace, 811
 - of an affine space
 - definition, 797
- Dirac notation, 1660
- direct graph
 - strongly connected components, 703
- direct sum
 - inclusion map, 173
 - projection map, 174
- directed graph, 702
 - closed, 703
 - path, 703
 - length, 703
 - simply connected, 703
 - source, 702
 - target, 702
- direction, 792
- direction of an affine subspace
 - definition, 811
- distance
