

- orthocenter, 942
- orthogonal, 759
 - basis, 470
 - complement, 449, 617
 - family, 449
 - linear map, 612, 625
 - lines, 941
 - reflection, 494
 - spaces, 465
 - symmetry, 494
 - transformation
 - definition, 465
 - vectors, 449, 524
- orthogonal group, 468, 955
 - definition, 470
- orthogonal matrix, 56, 338, 470
 - definition, 469
- orthogonal of V , 931
- orthogonal projection, 763
- orthogonal vectors, 54
- orthogonal versus orthonormal, 470
- orthogonality, 439, 448, 936
 - and linear independence, 449
- orthonormal
 - basis, 469, 528
 - family, 449
- orthonormal basis
 - existence, 458
 - existence, second proof, 459
- overdetermined linear system, 755
- pairing
 - bilinear, 419
 - nondegenerate, 419
- pairing between E and E^* , 930
- Pappus's theorem, 792
 - affine version, 829
 - projective version, 910
- parallel subspaces, 812
- parallelepiped, 219, 818
- parallelism, 791, 792
- parallelogram, 219, 818, 820
 - parallelogram law, 446, 524
- parallelotope, 219, 818
- parametric rational curve, 857
- Parseval identity, 2123
- partial map, 882
- partial ordered set
 - maximal element, 2126
- partial sums, 452
- partially ordered set
 - bounded, 2126
 - chain, 2126
- particle, 792
 - moving in 3D space, 792
- Pauli spin matrices, 590
- PCA, 770, 774, 776
- penalized objective function, 1719
- penalty function, 1719
- pencil
 - of circles, 880
 - of conics, 880
 - of hyperplanes, 868
 - of lines, 867, 932
 - of planes, 932
- pencil of hyperplanes
 - definition, 932
- pencil of lines
 - definition, 867
- permanent, 235, 1188
- permutation matrix, 323
- permutation metrix, 263
- perpendicular
 - vectors, 449
- perspectivities between lines, 887
- perspectivity
 - definition, 884
- physical forces, 791
- physics, 791
 - inspired by, 793
- piecewise linear function, 145
- pinhole model of a camera, 947
- pixel coordinates, 948
- Plücker's equations, 1231
