CONTENTS 15

5	1.1	Extended Real-Valued Convex Functions	. 1821
5	1.2	Subgradients and Subdifferentials	. 1830
5	1.3	Basic Properties of Subgradients and Subdifferentials	. 1842
5	1.4	Additional Properties of Subdifferentials	. 1848
5	1.5	The Minimum of a Proper Convex Function	. 1852
5	1.6	Generalization of the Lagrangian Framework	. 1859
5	1.7	Summary	. 1862
5	1.8	Problems	. 1864
<b>52</b> D	Dual	Ascent Methods; ADMM	1865
55	2.1	Dual Ascent	. 1867
53	2.2	Augmented Lagrangians and the Method of Multipliers	. 1871
55	2.3	ADMM: Alternating Direction Method of Multipliers	. 1876
55	2.4	Convergence of ADMM $\circledast$	. 1879
55	2.5	Stopping Criteria	. 1888
55	2.6	Some Applications of ADMM	. 1889
55	2.7	Solving Hard Margin (SVM <sub><math>h2</math></sub> ) Using ADMM	. 1894
55		Applications of ADMM to $\ell^1$ -Norm Problems	
55	2.9	Summary	. 1901
53	2.10	Problems	. 1902
IX	$\mathbf{A}$	pplications to Machine Learning	1905
