2190 INDEX

Plücker coordinates, 1231	positive semidefinite cone ordering, 1509
plane, 83, 811	potential energy, 1516
Poincaré separation theorem, 635	pre-Hilbert space, 518
point, 792, 797, 799	Hermitian product, 518
projective, 861	pre-norm, 543
points, 791	precompact, 1372
affinely dependent, 815	preconditioning, 1715
affinely independent, 813	preservation of the ratio of volumes, 828
assigned the weights λ_i , 805	primal feasibility equations, 1753
collinear, 812	primal problem, 1515, 1771
coplanar, 812	Primary Decomposition Theorem, 1097, 1101
points are not vectors, 818	principal axes, 748
points at infinity, 855, 863, 902, 905	principal component analysis
polar decomposition, 479	kernel version, 1923, 1925
of $A, 743$	kth kernel, 1926
polar form, 733	dual variable, 1926
definition, 743	principal components, 770
of a quadratic form, 442	principal components analysis, 770
polar line, 875	principal directions, 61, 774, 777
polyhedral cone, 1544, 1663	principal point, 947
polyhedral function, 1858	product rule, 1419
polyhedron, see \mathcal{H} -polyhedron	projected-gradient method with variable step-
polynomial curve, 856	size parameter, 1717
Poncelet, 930, 936	projection
Poncelet, 930, 936 position, 792	projection central, 858
	- ·
position, 792	central, 858
position, 792 vector, 793	central, 858 conic, 858
position, 792 vector, 793 positive	central, 858 conic, 858 linear, 493
position, 792 vector, 793 positive self-adjoint linear map, 734	central, 858 conic, 858 linear, 493 perspective, 858
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532 positive definite kernel, 1914	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493 projection of center c
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532 positive definite kernel, 1914 Cauchy-Schwarz inequality, 1916	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493 projection of center c definition, 884
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532 positive definite kernel, 1914 Cauchy-Schwarz inequality, 1916 Gaussian kernel, 1920	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493 projection of center c definition, 884 projective
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532 positive definite kernel, 1914 Cauchy—Schwarz inequality, 1916 Gaussian kernel, 1920 Gram matrix, 1914 pointwise product, 1916 positive kernel, see positive definite kernel	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493 projection of center c definition, 884 projective hyperplane, 865 line, 862, 865 plane, 862, 865
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532 positive definite kernel, 1914 Cauchy-Schwarz inequality, 1916 Gaussian kernel, 1920 Gram matrix, 1914 pointwise product, 1916 positive kernel, see positive definite kernel positive semidefinite	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493 projection of center c definition, 884 projective hyperplane, 865 line, 862, 865 plane, 862, 865 point, 862, 865
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532 positive definite kernel, 1914 Cauchy—Schwarz inequality, 1916 Gaussian kernel, 1920 Gram matrix, 1914 pointwise product, 1916 positive kernel, see positive definite kernel positive semidefinite locally compact group, 1923	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493 projection of center c definition, 884 projective hyperplane, 865 line, 862, 865 plane, 862, 865 point, 862, 865 projective (linear) group, 882
position, 792 vector, 793 positive self-adjoint linear map, 734 positive definite bilinear form, 440 self-adjoint linear map, 734 symmetric matrix, 1507, 1508, 1532 positive definite kernel, 1914 Cauchy-Schwarz inequality, 1916 Gaussian kernel, 1920 Gram matrix, 1914 pointwise product, 1916 positive kernel, see positive definite kernel positive semidefinite	central, 858 conic, 858 linear, 493 perspective, 858 Projection lemma, 1649 projection lemma Hilbert space, 1606 projection map, 493 projection of center c definition, 884 projective hyperplane, 865 line, 862, 865 plane, 862, 865 point, 862, 865
