12 CONTENTS

		8 Normed Affine Spaces	
	37.14	Futher Readings	. 1397
38	A D	etour On Fractals	1399
	38.1	Iterated Function Systems and Fractals	. 1399
39	Diffe	erential Calculus	1407
	39.1	Directional Derivatives, Total Derivatives	. 1407
	39.2	Properties of Derivatives	
	39.3	Jacobian Matrices	. 1421
	39.4	The Implicit and The Inverse Function Theorems	. 1429
	39.5	Tangent Spaces and Differentials	. 1436
	39.6	Second-Order and Higher-Order Derivatives	. 1438
	39.7	Taylor's formula, Faà di Bruno's formula	. 1444
	39.8	Vector Fields, Covariant Derivatives, Lie Brackets	. 1449
	39.9	Futher Readings	. 1451
	39.10	Summary	. 1451
	39.11	Problems	. 1452
T 7	T D	Proliminarias for Ordinairotion Theory	1 1 5 5
V	I P	Preliminaries for Optimization Theory	1455
40	Extr	rema of Real-Valued Functions	1457
40	Extr 40.1		
40		rema of Real-Valued Functions Local Extrema and Lagrange Multipliers	. 1458
40	40.1	Local Extrema and Lagrange Multipliers	. 1458. 1470
40	40.1 40.2	Local Extrema and Lagrange Multipliers	. 1458. 1470. 1473
40	40.1 40.2 40.3 40.4	Local Extrema and Lagrange Multipliers	. 1458. 1470. 1473. 1483
	40.1 40.2 40.3 40.4 40.5	Local Extrema and Lagrange Multipliers	. 1458. 1470. 1473. 1483
	40.1 40.2 40.3 40.4 40.5 New	Local Extrema and Lagrange Multipliers	. 1458. 1470. 1473. 1483. 14841487
	40.1 40.2 40.3 40.4 40.5 New	Local Extrema and Lagrange Multipliers	. 1458 . 1470 . 1473 . 1483 . 1484 1487
	40.1 40.2 40.3 40.4 40.5 New	Local Extrema and Lagrange Multipliers	. 1458 . 1470 . 1473 . 1483 . 1484 1487 . 1487
	40.1 40.2 40.3 40.4 40.5 New 41.1 41.2	Local Extrema and Lagrange Multipliers	. 1458 . 1470 . 1473 . 1483 . 1484 1487 . 1489 . 1498
41	40.1 40.2 40.3 40.4 40.5 New 41.1 41.2 41.3 41.4	Local Extrema and Lagrange Multipliers Using Second Derivatives to Find Extrema Using Convexity to Find Extrema Summary Problems *ton's Method and Its Generalizations Newton's Method for Real Functions of a Real Argument Generalizations of Newton's Method Summary	. 1458 . 1470 . 1473 . 1483 . 1484 1487 . 1489 . 1498
41	40.1 40.2 40.3 40.4 40.5 New 41.1 41.2 41.3 41.4	Local Extrema and Lagrange Multipliers Using Second Derivatives to Find Extrema Using Convexity to Find Extrema Summary Problems *ton's Method and Its Generalizations Newton's Method for Real Functions of a Real Argument Generalizations of Newton's Method Summary Problems	. 1458 . 1470 . 1473 . 1483 . 1484 . 1487 . 1489 . 1498 . 1498
41	40.1 40.2 40.3 40.4 40.5 New 41.1 41.2 41.3 41.4	Local Extrema and Lagrange Multipliers Using Second Derivatives to Find Extrema Using Convexity to Find Extrema Summary Problems *ton's Method and Its Generalizations Newton's Method for Real Functions of a Real Argument Generalizations of Newton's Method Summary Problems dratic Optimization Problems	. 1458 . 1470 . 1473 . 1483 . 1484 . 1487 . 1489 . 1498 . 1498 . 1507
41	40.1 40.2 40.3 40.4 40.5 New 41.1 41.2 41.3 41.4 Quae 42.1	Local Extrema and Lagrange Multipliers Using Second Derivatives to Find Extrema Using Convexity to Find Extrema Summary Problems Aton's Method and Its Generalizations Newton's Method for Real Functions of a Real Argument Generalizations of Newton's Method Summary Problems Quadratic Optimization Problems Quadratic Optimization: The Positive Definite Case	. 1458 . 1470 . 1473 . 1483 . 1484 . 1487 . 1489 . 1498 . 1498 . 1507 . 1507 . 1517
